### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 22, line 5, "said second control line" has been changed to —a second control line—because the second control line has not been mentioned in the claim.

### ***Information Disclosure Statement***

2. The information disclosure statements filed 09-04-03 and 12-27-04 have been considered.

### ***Allowable Subject Matter***

3. Claims 1-38 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach an apparatus and a method for determining whether memory cells in a non-volatile memory are over programmed. In particular, a method for detecting over programming comprises the steps of: programming one or more multi-state storage elements associated with a first control line; programming one or more multi-state storage elements associated with a second control line; and determining whether the one or more multi-state storage elements associated with the first control line are over programmed after performing the step of programming the one or more multi-state storage elements associated with the second control line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In the form PTO-892, the cited references teach methods for correcting over programming of memory cells.
